Installation Steps

Note: Please ensure complete installation when setting up

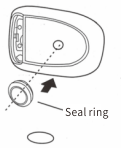

1. Please mark the center line of the drain outlet on the ground, then based on the toilet size, install the water inlet angle valve at the appropriate position on the wall.

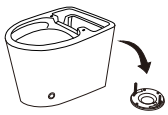

2. Lift the flip lid assembly up from the inside of the toilet.
Note: Do not pull the lid forcefully when lifting the toilet flip lid

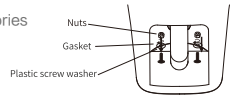

3. Please make sure the toilet is aligned with the center line of the drain outlet , there are two rough-in distance options, 305mm and 400mm, Please mark the location of the center hole.
(Use the appropriate holes based on your specific situation)
Install the sealing ring at the bottom of the toilet.

4. Install the flange and floor bolts at the sewage outlet according to the position shown in the right image. Attach the toilet to the flange, making sure the bolts line up with the holes in the toilet.

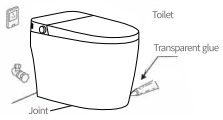

5. Use a wrench to tighten the nut and other accessories onto the retaining bolts.

6. To install the seat ring and toilet main body: the seat ring positioning hole should be aligned with the ceramic body positioning column. Then, with the seat ring in a horizontal position, press down on the back of the seat ring until it is fully installed.

7. Apply transparent glue around the base where the toilet meets the floor.
